## Bronson Bikes

Next to the Easyrider bikes, the "Then Came Bronson" Sportster is probably the next most commonly imitated bike. Still, you don't see that many. I found these photos on the web (Flicker?), taken outside the H-D museum.

*The third one back is a replica of the H-D Sprint used sometimes in the show for stunts.*

*It really wouldn't be too hard to build one. Most I've seen are not completely correct.*

CHRIS K

Been drawing as long as I can remember and into bikes since 1967. I do other kinds of art but enjoy painting and drawing motorcycle related stuff the most. I do commissioned artwork and sell limited edition prints.

*These two are the closest to the real thing in the bunch. They both feature a correct 21" front wheel.*
